

West Africa Experience

"This work unequivocally demonstrated the impact that rigorous rock physics analysis can make on risk reduction in rank exploration areas such as those that characterize our deepwater West African and Ukrainian exploration portfolios." Ronald L. Wallace, Senior Vice President of Exploration, Vanco Energy Company.

"We have collaborated with the Rock Solid Images team on numerous of our exploration initiatives in West Africa, including Ghana's Jubilee Field. We have been impressed with their commitment to technical excellence and customer satisfaction and are pleased to select them for this important role." Kenny Goh, Kosmos Energy Senior Vice President and partner, and Robin Sutherland, Tullow Exploration Manager.

Equatorial Guinea

Gabon

"We are looking forward to working with the team at Rock Solid Images on this important seismic inversion study. RSI's knowledge of the rock physics and reservoir properties of these play types in the region, combined with an impressive track record in West Africa was the primary reason for awarding this work. Our expectation is that this study will significantly de-risk our drilling decisions and, ultimately the appraisal of this block." Everton September, Vice President, PetroSA
