Rock Solid Images (AIM: RSI)

Contracts update: unconventional resource plays

Rock Solid Images (RSI), the independent geoscience consulting firm is building a leading position in the interpretation of US unconventional shale plays.

RSI has been awarded its fourth project this year by clients active in these areas. Revenues from shale play projects now exceed \$1.1 million and span a diverse range of stratigraphy including Eagle Ford, Waynesburg and Marcellus shales.

Stated Gareth Taylor, President of RSI: “We are pleased with our progress to date in developing workflow and technology solutions aimed squarely at the emerging unconventional shale markets in North America. Our ability to derive engineering properties from modern wide-azimuth seismic data, under-pinned by advanced rock-physics relationships established specifically for shale plays, has placed us at the vanguard of geophysical companies helping to open up these important new resources.”

About [RSI](http://www.rocksolidimages.com): RSI is an independent geoscience consulting firm offering quantitative reservoir characterization with the goal of reducing exploration drilling risk and optimizing reservoir appraisal and development plans. The Company is an industry leader in the interpretation and integration of seismic data with well log, CSEM and MT data, and uses advanced rock physics methods combined with sophisticated geologic models to deliver robust and reliable predictions of reservoir geometries and properties to our customers.
